

Software Support Agreements

Protect Your Security Investment

Purchasing a Software House and American Dynamics security system does more than arm your facility with state-of-the-art access control and video surveillance. It provides you, your employees and your visitors with the peace of mind you can only get from a provider known for ultra-reliable products and rigorously trained integrators.

With Software House and American Dynamics, you get enterprise-class, open platform products. The robust C•CURE 9000 access control solution combined with our flagship video solutions, VideoEdge and victor, provide a fully integrated security system.

The Value of a Software Support Agreement (SSA)

You have taken the measures necessary to secure your facility – protecting the investment in your security system is just as critical. An SSA provides your integrator with access to:

- Up to three new releases annually, which allows you to maintain version compatibility and protect against cyber attacks
- Regular updates to your system
- Technical support for your integrator on your behalf to ensure the software works with the latest camera handlers, controllers, encoders, etc.
- Support specialists who can quickly troubleshoot system problems across hardware, operating systems, databases and peripheral devices in analog and IP networks

Consider Buying a Software House and an American Dynamics SSA to:

- Reduce the cost of ownership by using your integrator’s expertise, knowledge and availability
- Increase your return on investment by having access to the latest software enhancements
- Prevent system downtime and delays by giving your integrator priority technical support for your system

What Else Should Your Company Consider?

- Teaming with your local integrator for on-site support to fully understand your security environment and technical issues
- Visit our website for a complete list of available courses and end user on-site training classes:
